

# Patrilineal chart of the More (Muir) ancestors of Daniel Wilcox More

## EARLIER GENERATIONS

The family tree (Lindsay - Ancestry.com) which traces the earlier **More** lineage has noticeable flaws: e.g. Sir John Muir was apparently the father of Andrew Muir, a remarkable accomplishment, since Sir John was born 12 years after his son. For that reason I have not continued this lineage, even though it continues for 5 more generations to Robert Muir b. 1439 and includes marriages to the Scottish Royal Family. Note that our ancestors (at least since 1700 lived in various villages within a range of 18 kilometers.
